Examiner, Art Unit 1715

DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The instant invention is distinguished over the prior art of record by a deposition method that alternately performs a step of supplying a Cu containing source material and a step of supplying a reductive gas to the substrate, and during an earlier first deposition period, the two steps are performed alternately *two or more times*, where each step of supplying the reductive gas during the first deposition period is for a first period; and following, a second deposition period, the two steps are performed alternately *two or more times*, where *each step of supplying the reductive gas during the second deposition period is for a second period that is shorter than the first period*. The prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims.

Powell [US 6464779] teaches a method for copper atomic layer vapor deposition [title] which provides a copper source material and a reductive gas, where the two supplying steps are performed alternately. However, Powell fails to teach during an earlier first deposition period, the two steps are performed alternately *two or more times*, where each step of supplying the reductive gas during the first deposition period is for a first period; and following, a second deposition period, the two steps are performed alternately *two or more times*, where *each step of supplying the reductive gas during the second deposition period is for a second period that is shorter than the first period*.

Chen [US 2003/0129308] teaches a film deposition method that alternately perform a step of supplying Cu containing source and a step of supplying a reductive gas to the substrate, where the reducing gas step of a first deposition cycle can be longer than the reducing gas step of a second deposition cycle (as explained in the previous issued action) [0060]. However, Chen fails to teach the two steps are performed alternately *two or more times*, for both the first and second deposition cycles.

Since the prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims, one skilled in the art would not have been motivated to perform the claimed process.

Acknowledgement of Applicant's Amendments

The rejection of the claims under 35 U.S.C. 103 is withdrawn due to Applicant's amendments; hence, subject matter is due for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
